

2014 to 2018

# Five-Year Idaho Transportation Investment Plan

November 2013

# TABLE OF CONTENTS

Executive Summary ..... 1

Funding Challenges ..... 2

Funding Assumptions ..... 3

Data-Driven Systems ..... 4

Project Selection..... 5

Delivering on Promises ..... 6

PROJECT LISTS

- District 1 ..... 7
- District 2 ..... 13
- District 3 ..... 19
- District 4 ..... 33
- District 5 ..... 40
- District 6 ..... 46
- Statewide ..... 53

Thank you for your interest in the department's Five-Year Transportation Investment Plan. This plan allows citizens to see, in non-technical terms, the transportation projects we plan to deliver over the next five years. It provides project information to our customers and partners in a clear, concise manner. This allows us to increase our transparency and allows you to hold us accountable for delivering on our promises. The 2014 - 2018 five-year plan shows:

- The department's funding challenges and assumptions
- The transportation system's needs and ITD's strategies to meet them
- How projects are prioritized and selected
- Which projects have been selected, how much they will cost, and when they will be completed
- How ITD will measure its progress

The department is moving in a new direction for investing the state's transportation funds. In addition to considering the condition of the infrastructure, the department analyzes how its funding can expand and attract businesses and create jobs.

This plan shows how we balance capital-investment decisions with our commitment to performance and economic opportunity. It also includes information about our dashboard indicators of pavement condition, bridge condition, safety, and six other performance measures to allow you to track our progress and see how we are doing.

The 2014 - 2018 plan reflects our commitment to customer service. It provides quick and easy access to valuable information about how we invest the public's money and select the projects that will best drive Idaho's economy.

This plan shows we are committed to becoming the best transportation department in the country.

Sincerely,

A handwritten signature in blue ink, reading "Brian W. Ness".

Brian W. Ness  
Director

Counties:  
Bonneville, Butte, Clark, Custer,  
Fremont, Jefferson, Lemhi,  
Madison, Teton

## Five-Year Plan Shows How ITD Delivers on its Promises

Publishing the Five-Year Idaho Transportation Investment Plan allows elected officials and taxpayers to track ITD's progress. The plan includes projects for highways, bridges, public transportation, railroad crossings, aviation, and non-motorized transportation.

Showing the costs and scheduled beginning and completion dates of every project allows elected officials and the public to see how the department delivers on its promises. The five-year plan also shows the department's funding assumptions and needs, and explains how transportation projects are prioritized and selected.

Delivering projects on time is important to the department's credibility and customer service. Stakeholders depend on the department to deliver projects to construction in the year they were intended.

## New Policy Speeds Project Delivery and Improves Cash Flow

In 2002, the department delivered 65 percent of its projects on time. In 2013, the department used new streamlined processes and major efficiency improvements implemented to deliver 90 percent of its projects on time.

The department is redefining how it delivers projects on time. Now project managers are required to deliver project plans one full year ahead of the year projects are scheduled for construction.

This policy change:

- Keeps ITD's promises to the citizens of Idaho
- Improves cash flow, making certain Idaho's tax dollars are invested rather than banked
- Allows contractors to plan predictable work flows, creates a more stable job market, and increases the number of bidders
- Positions ITD to invest cost savings or unexpected revenue into additional projects

## Using Management Systems to Maximize Funding Efficiency

The department's integrated management systems provide the data required to manage infrastructure investments and improve the ability to measure and adjust performance.

These systems allow the Idaho Transportation Board and the department to more effectively manage transportation investments. Performance management and data-driven decisions are vital to the department's success.

## Balancing Needed Projects with Available Revenue

ITD schedules projects to balance available revenue with the need to improve or maintain the system. The department's investment strategies address safety needs, coordinate road and bridge work, maintain and operate the existing system, and make the most efficient use of forecasted revenue.

## Energizing the Economy

Idaho's gross domestic product and transportation system are inextricably linked. Improving and maintaining Idaho's transportation infrastructure is a key component of Governor C.L. "Butch" Otter's vision to strengthen the state's economy through his Project 60 Initiative. Project 60 is a plan to grow Idaho's gross domestic product to \$60 billion.

In the past, ITD and most other transportation departments in the country used project lists to calculate how many jobs were created by each project. ITD's new strategic plan invests transportation funds to support Governor Otter's Project 60 goals.

This is a major cultural shift for the department and distinguishes ITD from most of the transportation departments in the country. An efficient, reliable transportation system enables economic opportunity.

## How to Comment

If you would like to comment on this five-year plan, call Adam Rush, ITD Public Involvement Coordinator, at (208) 334-8005 or e-mail your comments to [comments@itd.idaho.gov](mailto:comments@itd.idaho.gov).

## The Transportation System Powers Idaho's Economic Opportunity

With Idaho on the verge of economic recovery and expansion, maintaining a safe, efficient transportation system has never been more important. That requires Idaho to make the right decisions at the right time. ITD continues to look for lean, efficient ways to manage limited resources. The primary goal is to drive the state's economic opportunity.

Recognizing that funding is tight, ITD will continue to seek innovative ways to save money and invest its resources wisely. Today's investment decisions will stimulate tomorrow's economic growth.

## Roads and Bridges Are Aging

The condition of Idaho's state highways and bridges remains stable, but is projected to decline if transportation revenue is not increased.

More than one-third of bridges on the State Highway System are more than 50 years old. Many of them were built during the interstate-construction era of the 1950s and 1960s.

These bridges were designed to last 40 to 60 years before being replaced. At current funding levels, they will have to last 120 years.

The State Highway System has approximately 12,000 lane miles of paved highway. These pavements were designed to last 20 years, which requires the department to pave an average of 600 lane miles per year to keep the per-

centage of deficient pavement in Idaho from increasing.

The American Reinvestment and Recovery Act stimulus funds and GARVEE investments helped the department reduce the amount of deficient pavement from 20 percent in 2008 to 14 percent in 2012.

The American Association of State Highway and Transportation Officials found that every \$1 spent on highways in good condition saves up to \$14 if the repairs are postponed until the highways are in bad condition.

## Governor's Transportation Task Force Identifies Funding Gap

In 2009, Governor Otter formed the Governor's Task Force on Modernizing Transportation Funding in Idaho. The task force met nine times during 15 months, completing its work and issuing its findings in December 2010.

Lieutenant Governor Brad Little chaired the task force. In the cover letter he wrote to Governor Otter that accompanied the task force's findings, he stated *"First and perhaps foremost, the Task Force members solidly confirmed Idaho's real and significant transportation funding shortfall."*

The task force affirmed a growing funding shortfall for both the state and local highway systems. The task force's final report stated the following amounts are needed for the state and local transportation systems—in addition to cur-

rent funding levels:

- \$543 million annually to expand and operate the system, or
- \$262 million annually to operate, preserve, restore, and maintain the existing system.

## Federal Aid Highway Program Now in its Second Year

Moving Ahead for Progress in the 21st Century (MAP-21), the current federal transportation authorization bill, became law July 6, 2012, and covers a 27-month period.

Nationwide, FY14 highway funding is \$37.8 billion and \$10.7 billion for transit projects.

MAP-21 maintained funding for Idaho's transit program at previous levels, but reduced Idaho's highway budget by six percent. If Congress does not balance transportation revenues with current funding levels, Idaho's future transportation funds may be further reduced.

The law eliminated many programs. There are now only six core funding programs. Funding is based on 2009 levels. A lump sum will be provided for each core program.

MAP-21 requires states to set performance targets that support national performance measures, and expands safety efforts.

## Federal-Aid

Program funding levels for FY14 are based on anticipated MAP-21 apportionments. Forecasted federal highway funding for FY15 through FY18 is flat-lined at FY11 actual apportionment levels (pre-MAP-21). Inflation is estimated at two percent annually.

Obligation authority is assumed to be equal to 100 percent of estimated apportionments. Funding forecasts do not include year-end redistribution of obligational authority not used by other states. Approximately \$25 million in highway-related federal indirect cost recovery is redirected annually to State Highway System projects.

## State Highways

Estimates of state funds available for capital construction take into account projected revenues, the reservation of state matching funds for federal-aid, and other operational needs not shown in the ITIP. An estimated \$19.5 million in state funds are available for highway capital construction in FY14, \$7.5 million in FY15, \$5.2 million in FY16, \$6 million in FY17, and \$1 million in FY18.

## GARVEE Bonds

Idaho Code requires that no more than 30% of ITD's federal apportionment can be used for debt service. The Idaho Legislature has authorized the department to provide financing of \$857 million to complete the GARVEE program. The department uses federal highway revenue to repay the bonds. GARVEE bonds are revenue bonds that do not pledge the full faith and credit of the state of Idaho.

## Aeronautics

The majority of funding for airport improvements is provided directly to local airport owners by the Federal Aviation Administration. The owners provide most of the required local match and ITD provides the remaining funds.

The department receives Federal Aviation Administration funding for statewide planning and pavement evaluations. Airports that are not eligible for FAA funding receive matching grants from the department for airport improvements and planning. No additional state funds are available for aeronautics projects or services.

## Public Transportation

The forecasted federal funding for FY14 through FY18 is flat-lined at MAP-21 FY13 actual apportionments of \$9.4 million for rural capital and services, \$12 million for urban capital and services, and \$420,000 for statewide planning.

Dedicated state funds of \$312,000 have been made available for vehicle replacement needs. This does not include estimates of discretionary funding because they are typically earmarked in annual Congressional Appropriations Acts and are difficult to estimate.

## FEDERAL HIGHWAY APPORTIONMENTS TO IDAHO

(dollars in millions and rounded, does not include stimulus)

## Making Data-Driven Decisions to Meet State and Local Needs

After the department makes its funding assumptions, it begins working closely with local transportation agencies and municipal planning organizations to develop a data-driven transportation program. This brings broad community representation and input into the decision-making process.

State Highway System projects are designed to meet both state and local needs. The department's investment strategy is to provide complete transportation systems that link local roads and bridges with multiple modes of freight and commerce.

ITD strategically targets its resources to provide transportation infrastructure and services that contribute to and enhance Idaho's economic opportunity.

## Management Systems Allow Accurate Targeting of Investments

The department uses integrated, state-of-the-art management systems to ensure all transportation investments align with ITD's long-range vision for the transportation system.

These management systems provide the information required to track performance measures, allow better planning and management of infrastructure investments, and improve the department's ability to meet the state's transportation needs.

Performance management is vital to the department's success.

## New Strategic Plan Drives Investment Strategies

The department developed a new strategic plan in 2011. The plan's three goals drive the department's investment strategies:

- Commit to having the safest transportation system possible
- Provide a mobility-focused transportation system that drives economic opportunity
- Become the best organization by continually developing employees and implementing innovative business practices

The department's safety, mobility, and economic investments are focused on performance—targeted to maximize the impact of available resources.

The department forecasts its future revenue stream and continuously reviews actual receipts against the revenue forecast in all major funding sources.

Revenue streams are tracked monthly. If program adjustments are necessary, they are acted upon immediately.

Because current revenue levels do not allow the department to fund expansion projects, the 2014 to 2018 Five-Year Plan contains only preservation and restoration projects. These projects are designed to improve safety, extend the useful lives of roads and bridges, and drive economic opportunity.

## Data-Driven Decisions Drive Project Selection and Prioritization

Idaho's Five-Year Transportation Plan includes projects for highways, bridges, public transportation, and aeronautics. The transportation board and department select projects to further the department's mission of improving safety, enhancing mobility, and providing economic opportunity. The first step in the process occurs when the department's management team establishes program performance measures, priorities, and funding levels. Teams for each program area (roads, bridges, etc.) then meet to:

- Collect and analyze data to make project-timing decisions, such as determining the ideal time to perform a pavement-preservation or a bridge-rehabilitation project.
- Review and prioritize system needs to provide the highest return on investment and the greatest benefit to Idaho's economy.
- Recommend projects to meet the state's transportation needs within fiscal constraints.

## Collaboration Gathers Input and Project Recommendations

The department collaborates with the state's metropolitan planning organizations and local governments to gather input and project recommendations. ITD's management team reviews the recommendations and forwards approved projects to the Idaho Transportation Board.

Following the board's review, the public is invited to comment. After the comment period ends, the board again reviews the selected projects and approves a transportation program.

## ITIP DEVELOPMENT CALENDAR

<b>January</b>	ITD makes federal and state revenue forecasts.
<b>February</b>	ITD provides its federal and state revenue forecasts to metropolitan planning organizations, the Local Highway Technical Assistance Council (LHTAC), and ITD's six district offices.
<b>April/May</b>	ITD receives project requests from transportation agencies and prepares a draft ITIP.
<b>June</b>	Draft ITIP submitted to the Idaho Transportation Board for Approval.
<b>July</b>	Draft ITIP available for public review and comment.
<b>August</b>	ITD develops final recommended ITIP.
<b>September</b>	Final ITIP submitted to the Idaho Transportation Board for approval.
<b>October</b>	Board-approved ITIP submitted to the Federal Highway Administration and the Federal Transit Administration for approval.
<b>November</b>	Federal Highway Administration and the Federal Transit Administration approve ITIP Federal Submittal Document.
<b>Ongoing</b>	ITD obtains input from citizens, elected officials, tribal governments, state and federal agencies, metropolitan planning organizations, the Local Highway Technical Assistance Council, and other interested public and private organizations.

## Promises Made—Promises Kept

To assure success in achieving its strategic goals and delivering on the promises made in the prior year, ITD monitors the 10 performance measures shown on this page. Plans to achieve each performance measure cascade down into the organization business plans, work plans, and individual employee performance plans.

---

### Five-Year Fatality Rate

The five-year fatality rate per 100,000 vehicle miles traveled decreased from 1.86 in 2006 to 1.30 in 2012. Fatalities decreased from 267 in 2006 to 184 in 2012, the second lowest number of fatalities in Idaho since 1956.

**Goal:** Reduce the five-year fatality rate to 1.29 per 100 million vehicle miles traveled by the 2009-2013 period.

---

### Percent of Time Highways Clear of Snow/Ice During Winter Storms

The percent of time highways are clear of snow and ice during winter storms increased from 28% in 2010 to 54% in 2012.

**Goal:** Maintain at least 55% unimpeded mobility during winter storms.

---

### Percent of Pavement in Good or Fair Condition

The percent of pavement in good or fair condition increased from 80% in 2006 to 86% in 2012.

**Goal:** Maintain at least 82% of all state highways in good or fair condition.

---

### Percent of Bridges in Good Condition

The percent of bridges in good condition increased from 67% in 2006 to 73% in 2012.

**Goal:** Maintain at least 80% of all bridges in the State Highway System in good condition.

---

### Percent of Highway Projects Developed on Time

In 2002, the department delivered 65% of its projects on time. In 2013, the department used new streamlined processes and major efficiency improvements implemented to deliver 90% of its projects on time.

**Goal:** Have 100% of the current year highway projects ready for bid by September 30.

---

### Construction Cost at Award as a Percent of Budget

The percent of construction cost at award as a percent of budget increased from 76% in 2009 to 102% in 2013.

**Goal:** Maintain Cumulative Construction Cost at Award within 10% of Budget.

---

### Final Construction Cost as a Percent of Contract Award

The final construction cost as a percent of contract award decreased from 106% in 2009 to 105% in 2012.

**Goal:** Maintain Final Cost within +/-5% of the Contract.

---

### Administration and Planning Expenditures as a Percent of Total Expenditures

The administration and planning expenditures as a percent of total expenditures increased from 5.5% in 2006 to 5.6% in 2012.

**Goal:** Maintain Administration and Planning Expenditures within 4.5% to 5.5% of the total.

---

### Days to Process Vehicle Titles

The average days to process a vehicle title increased from seven days in 2006 to eight days in 2012.

**Goal:** Maintain an average seven-day processing cycle including transit time from county offices.

---

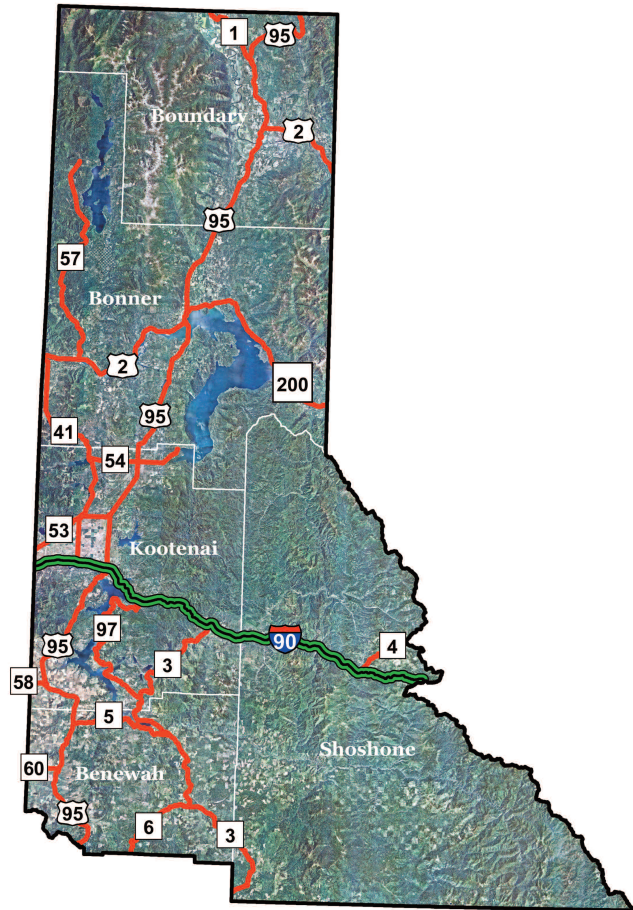

### DMV Transactions Processed on the Internet

The number of DMV transactions processed on the Internet increased from approximately 111,600 in 2006 to approximately 254,100 in 2012.

**Goal:** Process 267,350 on-line transactions annually by 2014.

To view the current status of ITD's performance measures and see how the department is delivering on its promises, visit [itd.idaho.gov/dashboard](http://itd.idaho.gov/dashboard).

## District 1

Damon L. Allen, District Engineer  
600 W. Prairie Ave.  
Coeur d'Alene, Idaho 83815-8764  
(208) 772-1200

Idaho Transportation Board  
Vice Chairman  
Jim Coleman  
Coeur d'Alene

- Land area: 7,752 sq. miles
- Lane miles: 1,495
- Centerline miles: 597
- Bridges: 278

District 1 has five counties (Boundary, Bonner, Kootenai, Benewah, and Shoshone), has a U.S. Navy submarine base, and is Idaho's only district with an international border.

The district is mountainous with numerous rivers, streams, and lakes, and is home to approximately 212,000 residents (14% of the state's total population).

## District 2

Dave Kuisti, District Engineer  
2600 Frontage Road  
P.O. Box 837  
Lewiston, Idaho 83501-0837  
(208) 799-5090

District 2 Board Member  
Jan Vassar  
Lewiston

- Land area: 13,403 sq. miles
- Lane miles: 1,500
- Centerline miles: 694
- Bridges: 175

District 2 has five counties (Clearwater, Idaho, Latah, Lewis, and Nez Perce), and is Idaho's only district with a seaport, which is the west coast's most inland port. This is Idaho's only district without an interstate highway.

The topography varies from highly productive rolling hills of the agricultural Palouse Region to the mountains of the Continental Divide, and is a destination for outdoor enthusiasts. District 2 is home to approximately 128,000 residents (8% of the state's total population).

## District 3

Dave Jones, District Engineer  
8150 Chinden Boulevard  
P.O. Box 8028  
Boise, Idaho 83714-8028  
(208) 334-8300

District 3 Board Member  
Julie DeLorenzo  
Boise

- Land area: 21,884 sq. miles
- Lane miles: 2,603
- Centerline miles: 1,024
- Bridges: 396

District 3 has 10 counties (Ada, Adams, Boise, Canyon, Elmore, Gem, Owyhee, Payette, Valley, and Washington), is Idaho's most populated district, and also has the most lane miles and bridges of Idaho's six districts.

The district's terrain varies from high desert to agricultural to rugged mountains, and is home to approximately 668,000 residents (43% of the state's total population).

## District 4

Devin O. Rigby, District Engineer  
216 S. Date Street  
P.O. Box 2-A  
Shoshone, Idaho 83352-0820  
(208) 886-7800

District 4 Board Member  
Jim Kempton  
Albion

- Land area: 11,572 sq. miles
- Lane miles: 2,427
- Centerline miles: 967
- Bridges: 296

District 4 has eight counties (Blaine, Camas, Cassia, Gooding, Jerome, Lincoln, Minidoka, and Twin Falls), is a rural agricultural area, the world's largest producer of Rainbow Trout, and is home to the Sawtooth National Recreation Area.

The district varies from mountains in the north to high desert in the south, and is home to approximately 186,000 residents (12% of the state's total population).

## District 5

Ed Bala, District Engineer  
5151 S. Fifth Avenue  
P.O. Box 4700  
Pocatello, Idaho 83205-4700  
(208) 239-3300

District 5 Board Member  
Dwight Horsch  
Pocatello

- Land area: 9,491 square miles
- Lane miles: 1,886
- Centerline miles: 710
- Bridges: 321

District 5 has seven counties (Bannock, Bear Lake, Bingham, Caribou, Franklin, Oneida, and Power), and is home to the Potato Capitol of the World—Blackfoot, Idaho.

The district's terrain includes fertile agricultural land, high desert, and aspen-covered mountains. District 5 is home to approximately 212,000 residents (14% of the state's total population).

## District 6

Blake Rindlisbacher, District Engineer  
206 N. Yellowstone Avenue  
P.O. Box 97  
Rigby, Idaho 83442-0097  
(208) 745-7781

District 6 Board Member  
Lee Gagner  
Idaho Falls

- Land area: 18,588 sq. miles
- Lane miles: 2,337
- Centerline miles: 992
- Bridges: 358

District 6 has nine counties (Bonneville, Butte, Clark, Custer, Fremont, Jefferson, Lemhi, Madison, and Teton), and has the country's longest main street—33 miles—in Island Park.

The terrain varies from the rugged Salmon River mountains in the north to high desert in the south, and is home to approximately 207,000 residents (13% of the state's total population).
